Notes

- On the login screen it will automatically know if the users email is attached to an account. Therefore logging them in.
- This app will be designed to be proactive. Meaning as the user shops it learns more about the user to tailor products to them. Ex. A customer who buys only edibles and cosmetics will see more of those in their searches.
- Profiles are designed to let the user shop separately from their main account. This allows them to shop for others while keeping their profile learnings intact.
